HISTORICAL REVIEW

As the result of the efforts of a group of concerned citizens, the Montcalm Community College idea passed through the study stages and became a reality by means of an election held March 7, 1966. The newly elected Board of Trustees, provided with a one mill tax levy and a will to confront the task, selected a president and a business manager who began their official work in August of 1966. The processes of selection of a site and an architect were completed in early fall of 1966. Construction bids for the first building were opened in September of 1966 and the first buildings were dedicated September 26, 1967.

In order to emphasize the strong community commitment to vocational education, the third professional to join the Montcalm Community College staff on February 1, 1966, was a Dean of Vocational/Technical Studies. The first full-time programs of Montcalm Community College were vocational programs which started on August 22, 1966. By late fall of 1967, all of these programs were housed on campus. In the fall of 1971 over 53% of the registered credit hours reported were in vocational/technical courses.

In August 1966, the Learning Resources Director began assembling materials for a comprehensive study center for Montcalm Community College.

On July 1, 1967, with the arrival of the first Dean of Students, the formal counseling, admissions, and registration program began. Student activities such as student newspaper, choir, student government, and interscholastic athletics began during the fall semester of the 1967-68 academic year.

The position of Academic Dean became a part-time position in January of 1968 and has been a full-time position since the fall of 1968.

Because of the recognized role of community involvement in a community college and the pressing priorities demanded of other administrators, on February 1, 1969, the position of Director of Community Services was filled. This division assumed responsibility for coordinating needs of various groups from the community and the resources of the college. The results have been adult education courses, non-credit courses, short courses, conferences, and cultural activities. The development of off-campus teaching centers has been another direct result of efforts by the Community Services Division.

The staff of Montcalm community College has been involved in a program of self-appraisal and institutional analysis designed to facilitate an examination by a team to be sent to the campus by the North Central Association of Colleges and Universities. It is currently expected that this visit will occur in the fall of 1972 and that the result should be full accreditation by the end of the 1973-74 academic year.

The college staff, Board of Trustees, and citizens of Montcalm Community College District will strive to maintain the college as an institution dedicated to the service and well-being of the community it serves.
THE EDUCATIONAL PLAN

EDUCATIONAL OBJECTIVES

Montcalm Community College subscribes fully to the following institutional objectives:

1. To provide vocational and technical study leading to occupational competence at the semi-professional and skilled levels; also to assist in upgrading the skills of unemployed persons.

2. To provide academic study at the freshman and sophomore levels transferable to senior institutions and acceptable toward a baccalaureate degree.

3. To provide assistance for all students through social, vocational, and educational counseling and guidance.

4. To provide general education for those who study primarily to become more knowledgeable about their cultural, social, and scientific environment.

5. To provide adult and continuing education, both through the regular curriculum and through study designed to meet specific objectives.

6. To provide a center for community service through exhibits, lectures, concerts, and similar activities in the Humanities; also, to provide facilities in which community groups may carry on similar projects.

7. Through an organized program of student activities, to provide for growth in social skills and the development of responsible community citizenship.

Being aware that the above objectives describe a comprehensive community college, the staff and trustees of Montcalm Community College are utilizing them as guidelines in the development of this college.

However, to describe the objectives of Montcalm Community College solely in such general terms is stating only one aspect of the goals. The important purposes are better defined in terms of the people who will participate in the educational program, the instructors and students — the community of learners mentioned above. Only to the extent that the educational needs of students are met will the objectives of Montcalm Community College be realized.

In establishing the programs, certain assumptions have been made regarding these needs:

1. At least 50% of the student body will request programs in the vocational/technical fields.

2. At least 10% of the enrolled students will successfully transfer to senior institutions to complete work on a baccalaureate degree, and some of these will be in technical programs at Montcalm Community College.

3. All students — youth and adult, academic and vocational/technical, transfer and non-transfer — will expect to understand a great deal about today's complex society after completing study at this institution.

4. All students will anticipate a quality collegiate program of studies — including skillful teaching, opportunities for creative thinking, and the challenge to become self-directive in their academic life.

5. Each student at Montcalm Community College expects that the chief outcome of his educational experience at this institution will be the skill, mental awareness, and persistent desire to become a lifetime learner.

Both the institution and personal objectives stated above become a mandate to those in whom the responsibility for the development of this college has been vested. These will consistently form the master guidelines against which decisions regarding the program of studies, building design, and provisions for student life are measured.

ACCREDITATION

Almost from the moment the first President began his work with Montcalm Community College, the institution has aggressively followed the prescribed steps which will lead to accreditation under the North Central Association of Colleges and Secondary Schools. By late 1965 the Association had appointed Dr. Daryl Pendergraft of the State University of Northern Iowa as the Consultant/Examiner for this college.

To expedite the transfer of Montcalm Community College students to four-year institutions during the normal period of five or more years before accreditation, Michigan public and private colleges and universities have assured — in writing — the acceptance of academic credits at full value for which a grade of "C" or better has been earned at Montcalm Community College.

While technical and vocational courses are designed primarily to promote occupational competency for students enrolled in the programs, certain State universities have agreed to appraise these Montcalm Community College credits for possible transfer where they are appropriate to a student's degree program.

Montcalm Community College was awarded status as a Recognized Candidate for Accreditation by the North Central Association in April of 1969, in the minimum time possible. Montcalm Community College is completing the extensive self-study which will need to be updated for a visitation in the fall of 1973. Following this visitation, a decision will be rendered by the Association concerning the application for accreditation.

Montcalm Community College is moving, successfully and on schedule, toward full accreditation.

Montcalm Community College holds full membership in the American Association of Junior Colleges, the North Central Council of Community and Junior Colleges, the Michigan Community College Association, and the Michigan Association of Junior and Community Colleges.
INSTRUCTIONAL FACILITIES

The 1967-68 academic year became the time for transition from teaching classes in rented or borrowed facilities to full-scale, on-campus operation in buildings designed especially for Montcalm Community College. During the year students and their instructors began using the Two-Story Academic building, the Vocational Shop building, and then the Learning Resources Center. Also completed was the Heating Plant/Service building.

The Learning Resources Center is the central study area of the college and is an integral part of the educational program. The physical facilities provide individual study carrels, group seating, conference rooms, an electronic listening laboratory for both individual and group audio study, and a separate reading laboratory. The materials collection includes a carefully chosen and growing book collection of over 15,000 volumes, approximately 250 periodicals and newspapers, microfilm titles for back issues of needed journals, and several hundred disc and tape recordings.

In addition to regular classrooms, the Two-Story Academic facility features three demonstration/lecture rooms for the sciences, each adjacent to a well-equipped laboratory; a business secretarial wing with laboratories for business machines and shorthand transcription; the practical nursing facilities; and the drafting and design rooms.

Another addition to the campus is the One-Story Academic building, first put into use on August 25, 1969. In addition to a number of regular classrooms, its special features include two lecture/demonstration halls seating 100 and 135 persons respectively, with one small group seminar room immediately adjacent.

Early planning for instructional facilities at Montcalm Community College provided for a building which would accommodate both technical degree and vocational programs of study. However, facilities for a number of the classroom-oriented occupational studies — practical nursing, business education, drafting — were integrated into the Two-Story unit. During the 1969-70 year it became obvious that there was a rapidly growing need for instructional space related to the industrial/mechanical skills. Consequently, planning began in January, 1967, for the Vocational Shop building which was ready for use by automotive mechanics, welding, industrial technology and apprenticeship beginning in January, 1968. The 1971 addition doubled the floor space permitting space for aircraft mechanics and residential construction laboratory.

The Barn Theatre is being developed for drama activities of campus and community groups. Several miles of nature trails have been developed for nature study.

Other projects, as yet unannounced, are in the preliminary planning stages.

EDUCATIONAL PHILOSOPHY

Montcalm Community College has a basic educational philosophy of which the student should be aware. The college is committed to the following premises:

1. That setting personal goals is a lifelong process, and success in life often depends upon fulfilling those goals which one has set for himself. Also, that goal-setting is often a shaping and reshaping process in which the student is an active participant who must find a greater awareness of himself in society. Further, that while the short time spent at Montcalm Community College does not fulfill many lifetime goals, the daily close contact between instructor and learner helps establish goals and plan how to achieve them.

2. That all educational pursuits are of equal dignity. As Governor George Romney remarked at the Montcalm Community College Groundbreaking Ceremonies on September 25, 1966, "All work is good, whether it is done with the head or the hands."

The college foresees that its student body will be about equally divided between the academic and vocational/technical divisions and anticipates the same high level of accomplishment in both. Further, it is believed that a person whose major emphasis lies in one division would benefit from educational experiences in the other.

3. That General Education, as presented by Montcalm Community College and described later in this catalog, is a most effective means of providing for knowledgeable citizenship through the understanding of our physical, social and cultural world. Further, that the General Education approach is also effective in providing the basic groundwork for upper division collegiate study after transfer to senior institutions.

4. That stimulating, exciting and challenging teaching is vital to learning.

5. That instruction at Montcalm Community College must provide the basis for continuous lifelong learning.

6. That high standards of moral and spiritual character are an essential attribute for personal well-being.
ADMISSION TO THE COLLEGE

Applicants shall possess a high school diploma or, if over the age of 21 years, shall submit to an educational equivalency examination as prescribed by the Director of Admissions.

Exceptions to the above, in keeping with the “Open Door Policy” of Montcalm Community College, may be made at the discretion of the Director of Admissions and/or the Admissions Committee.

ADMISSIONS PROCEDURE

The following procedure is followed by all students enrolling for the first time at Montcalm Community College.

a. Submit an application (available at your high school office or the College Dean of Students Office). Include a check for the $5.00 registration fee.

b. Request that your high school office forward one copy of your transcript of grades and standardized test results to the Dean of Students.

c. Only full-time students are required to submit a report of physical examination. Exceptions are: Practical Nursing students, students entering MCC through Vocational Rehabilitation, and students planning on participation in Physical Education. These students must submit a report of physical condition regardless of the number of credit hours for which they are enrolled. An MCC physical examination form must be secured from the Dean of Students’ Office, completed by your family physician, and returned to the Dean of Students.

d. The American College Test (ACT) is recommended but not required of students entering the College. Students who anticipate later transferring to four-year institutions should continue to register for the ACT.

e. Male students: MCC will need to know your Selective Service Board name and your own lottery number. Your admission, registration, and continuing enrollment status will be reported to the proper Board by the College.

f. Students transferring from other post-secondary schools should also have a transcript of college work sent to the Dean of Students. Students who were enrolled in the previous semester or summer session need not reapply for admission. Students making last-minute plans to attend Montcalm Community College may enroll on a tentative basis. It will not be possible, however, to grant official credit for courses completed unless all admissions requirements are met.

EXPENSES

TUITION

Resident of Montcalm Community College District: $11.00 per credit hour
Michigan Non-Resident Students: $16.00 per credit hour
Out-of-State Students: $25.00 per credit hour

PLEASE NOTE: The Trustees of Montcalm Community College sincerely desire to keep the cost of attending this institution as low as possible for the student. However, tuition changes are a direct reflection of the present economy, and the costs of operating a college are—like the economy itself—changing rather rapidly.

If a tuition charge becomes necessary for the following academic year, all present students and new 1973-74 applicants will be notified immediately by letter.

Residents and non-residents and out-of-state students are defined as follows:

Resident Students
1. Students now living with their parents or legal guardian, providing the parents or legal guardian reside within the boundaries of Montcalm Community College District.

2. Students under 18 years of age whose parents are not living or for whom there is no legal guardian, providing they reside within the boundaries of Montcalm Community College District.

3. Single students under 18 years of age who have resided within the boundaries of Montcalm Community College District for at least six months immediately prior to the first day of classes.

4. Married students under 18 years of age who have resided within the boundaries of Montcalm Community College District for at least six months immediately prior to the first day of classes.

Non-Resident Students
1. Single students 19 years of age or over and married students who have not resided within the boundaries of Montcalm Community College District for at least six months prior to the first day of classes.

2. Students under 18 years of age whose parents or legal guardians do not reside within the boundaries of Montcalm Community College District.

Michigan Residence Defined

In determining the Michigan residence status the college will apply the following rules:

1. The residence of a student who is a minor follows that of his parents or legal guardian, except that a minor student who comes to this institution from another state or
school cannot be registered as a resident of this state on the basis of having a
resident of this state as guardian except by permission of the Board of the Institution
in each individual case. Six months after the parents of a minor leave the state, the
minor becomes a non-resident student.

2. A person who is at least 18 years of age at the time of registration in the institution
and who has resided in this state six months next preceding the date of registration
without being registered at a state-supported college or university during that period
is deemed a resident of this state for the purpose of such registration.

3. The residence of a wife follows that of her husband, except that a woman student who
is a resident under paragraphs 1 or 2 may continue to register as a resident of this
state although subsequently marrying a non-resident student or other non-resident.

4. No person is deemed to have gained a residence in this state while a student at any
institution in this state.

5. A person in the service of the United States, and his wife or minor children, who have
met the six-month residence requirements in paragraph 2, may register as residents of
this state.

6. An alien lawfully admitted for permanent residence in the United States and who has
obtained his permanent visa, and his wife or minor children, who have met the other
requirements herein for residence, may register as residents of this state.

7. A full-time member of the "teaching staff," and a member of the teaching staff whose
appointments require at least three contact hours of teaching each week in regularly
assigned formal classes, and their dependents, may register as residents of this state.

8. Discretion to adjust individual cases within the spirit of these regulations is vested in
an officer appointed by the Board of this institution.

Dual Residency

1. In cases of dual residency, the residence from which the federal income tax return is
filed shall determine residency;

PAYMENT OF TUITION AND FEES

Tuition and fees are due and payable in full on the day of registration.

Students unable to pay the tuition and fees should consult with the Coordinator of
Student Financial Aid concerning a loan no less than three weeks prior to the enrollment
date.

No other credit arrangements can be made through the college.

Refunds will be made by check as follows:
a. Refunds for students over 18 years of age will be made payable to the student and
mailed to the address given by him, except in paragraph b. below.

b. Students under special scholarship and/or loan program administered by Montclair
Community College will receive no refund; the refund will be returned to the donor.
Those scholarships given directly to the student and not administered by the college
will be refunded as in paragraph a. above.

Tuition charges for college credit apprenticeship programs shall be made in ac-
cordance with the residency requirements for all other students. The student activity fee
charge shall not be in effect for apprenticeship students nor for any shared-time high
school student who may be enrolled.

Non-credit course fees shall be established and assessed for each course.

FEES

Registration Fee each semester ........................................... $ 500
Submitted with application for admission.

Matriculation Fee ............................................................. $1500
Payable once only at the time of initial registration at Montclair Community College.
Students taking less than 12 credit hours of work during their initial semester need not
pay the Matriculation Fee. However, this must be paid by the time the student has
registered 12 credits of study at Montclair Community College.

Student Activity Fee, per semester ....................................... $10.00
For students registered for 7 or more hours, except apprentices and shared-time.

Class Fees ..................................................................... $10.00 (13 hours or more)
7.50 (10-12 hours)
5.00 (7-9 hours)
2.50 (4-6 hours)
1.00 (3 hours)

SCHEDULE FOR TUITION REFUNDS FOR ON-CAMPUS CLASSES

If withdrawal takes place:
During first week .................................................. full refund of tuition only
During second week ........................................... 75% refund of tuition only
During third week ............................................... 50% refund of tuition only
During fourth week, or thereafter — no refund

SCHEDULE FOR TUITION REFUNDS FOR OFF-CAMPUS CLASSES

No refunds after first night of classes

FEES ARE NOT REFUNDABLE
FINANCIAL AID

The financial aid policy of Montcalm Community College reflects the desire of the College to aid in the educational success of the students who have demonstrated need and the needs of the individual applicant. Montcalm Community College is a member of the College Scholarship Service Assembly and subscribes to the principles of financial aid of that organization. All scholarships and other forms of assistance are awarded only to students who have demonstrated financial need using the Parent's Confidential or Student Independent Statement of the College Scholarship Service. No awards are available solely for special talents such as music, athletics, or specific academic achievement.

The College believes in the self-help concept in financing the college education and assumes every family will make all reasonable sacrifices in financing their son or daughter's education before applying to the College for assistance. The College awards the package form of financial aid, usually combining scholarships with job and/or loan to meet each student's need.

EDUCATIONAL OPPORTUNITY GRANTS

This Federal program of assistance is intended for students of great financial need. Grants range from $200 and up per academic year depending on demonstrated need. They must be matched with assistance of an equal amount in a package which may include other grants, loans, or campus employment. These grants may be renewed each year of the undergraduate program if the individual continues to qualify.
ACADEMIC REGULATIONS

Certain academic policies, regulations, and practices prevail at Montcalm Community College. These provide the basic framework within which a student's achievement and academic status are expressed. Their appearance here is to be interpreted as official policy of the College enabling the community of learning to function.

SEMESTER SYSTEM

Montcalm Community College operates on the basis of two semesters per year. The first semester begins right after Labor Day and is completed by the Christmas holidays. The second semester opens in early January and ends about mid-May. Six and eight-week summer school sessions are usually offered by the College.

CLASSIFICATION OF STUDENTS

Freshman — A student who has completed less than twenty-five semester hours of study.

Sophomore — A student who has successfully completed at least twenty-five semester hours of study but who has not yet qualified for an Associate Degree or a certificate.

Full-time — By legal definition, one who carries twelve or more semester hours of study. However, the student must bear in mind the number of credit hours required for an Associate Degree and his common desire to graduate after four semesters of study.

Part-time — A student carrying less than twelve semester hours.

GRADUATION REQUIREMENTS

Students working toward a certificate or diploma in a vocational/technical field must complete all established requirements for the award, including at least a 5.00 grade point average on a 12.00 point scale.

Those pursuing an Associate Degree must complete not only the required semester credits but also the proper sequence of courses as herein presented, with an overall 5.00 grade point average.

Transfer students who have earned credits at other institutions of higher education may request that these credits be applied toward an Associate Degree at Montcalm Community College. However, 24 credits of the total presented for graduation must be earned at Montcalm Community College, and the student must be enrolled at this institution during the final semester before receiving his degree.

SELECTION OF PROGRAM OF STUDY

Selection of a student's program of study takes place at the admission counseling interview prior to registration and/or the start of classes. During the counseling interview, the student will be advised of specific course requirements necessary for completion of his program.

Exceptions to specific program requirements will be made only by the Dean of the appropriate division of the College or the Dean of Students and/or his designated representative. Exceptions must be authorized in writing.

CLASS ATTENDANCE

It is the policy of Montcalm Community College that all students shall attend all classes in the courses for which they are registered. Absence from classes shall, in no way, relieve the student from completion of assigned work.

The matter of regular class attendance shall be resolved between each instructor and his students. Some absences — for reasons of illness, field trips, and other like occurrences — in unavoidable, and advance arrangements should be made for completion of work whenever possible.

VETERANS

Montcalm Community College has been approved for study under the "G.I. Bill" by the Veterans Administration.

Applications for entitlement to G.I. Bill benefits and information regarding study for ex-service men and women at Montcalm Community College are available at the Admissions Office.
DRAFTIES

A student who is drafted into the service of the United States by regular draft board procedures during any semester shall be entitled to full refund of tuition and fees paid for that semester provided he is not able to complete the course work required to enable him to be given a grade. The student must present satisfactory evidence that he has, in fact, been drafted and must apply for refund during that semester.

INCOMPLETE GRADES

The I grade will be employed sparingly. It will be awarded in the case where a student has found it impossible to complete required course work by the close of a semester for reasons beyond his control. It is an indication by the instructor of his belief that the student will receive a passing grade when the requirements have been fulfilled. The following procedure is observed:

a. An "I" mark shall be entered on the record when a course of study is incomplete at the termination of the scheduled semester.

b. An "I" mark shall remain without alteration indefinitely or until such time as the requirements of the course are satisfied and warranted in writing by the instructor to the Dean of Students.

c. An "I" mark shall not be averaged with other grades to establish a grade point average (GPA).

GRADING SYSTEM

Academic achievement will be appraised and recorded by means of the following system of letter grades:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Honor Point Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>12</td>
</tr>
<tr>
<td>A</td>
<td>11</td>
</tr>
<tr>
<td>A-</td>
<td>10</td>
</tr>
<tr>
<td>B+</td>
<td>9</td>
</tr>
<tr>
<td>B</td>
<td>8</td>
</tr>
<tr>
<td>B-</td>
<td>7</td>
</tr>
<tr>
<td>C+</td>
<td>6</td>
</tr>
<tr>
<td>C</td>

<tr>
<td>N (Preceding a grade indicates credit is not recommended for transfer-tertiary credit only)</td>
<td>0</td>
</tr>
</tbody>
</table>

* Audit applies to the situation where a person pays tuition for a course but is not required to complete assignments or examinations.

W (Withdrew while passing)

HONORS

Each semester a Dean’s Honor List will be issued including the names of all students whose semester Grade Point Average is between 3.00 and 10.00. The President’s Honor List will include those whose semester GPA is 10.00 or over.

Distinguished Dean’s Scholars will include those who have completed at least two semesters of study with a cumulative GPA between 3.00 and 10.00. The President’s Scholars will be those who have completed two or more semesters with a cumulative GPA of at least 10.00.

ACADEMIC PROBATION AND DISMISSAL

For Students pursuing an Associate Degree, College Transfer or Certificate: All students who hope to earn an Associate Degree or Certificate in either the academic or vocational/technical studies, or who hope to transfer to a four-year institution, will be subject to the following grade point regulations:
1. Students who achieve less than a 1.00 Grade Point Average (D-average) during their first semester at Montclair Community College will be dismissed for academic reasons. Students dismissed may refer to item 5 below.

2. Failure to achieve at least a 4.00 Grade Point Average (C-average) at the end of the first semester will result in the student's being placed on academic probation.

3. A student will continue on probation until his cumulative Grade Point Average has been raised to 5.00 or above.

4. While on probation, a student must achieve a 5.00 Grade Point Average each semester. Failure to do so will result in academic dismissal.

5. A student subject to academic dismissal may follow one of three courses of action:
   a. He may accept the dismissal.
   b. He may request assistance in the Counseling Center, primarily to explore the advisability of a change of curriculum. If such a change is decided upon, the counselor will make his recommendation in writing concerning the student's status. Written approval for continuing in a program will be sought from the Dean of the Division into which the student wishes to enter.
   c. A student dismissed from Montclair Community College for academic reasons may appeal before the Dean of Students for special consideration.

6. Students dismissed for academic reasons, either from Montclair Community College or any other college, may be required to wait for a full semester before re-entering the College.

7. Students transferring into Montclair Community College shall be subject to all regulations stated above from the beginning of their enrollment.

DROPPING/ADDING CLASSES

In order to officially drop/add a class or classes, students must follow this procedure:
   a. Students must get a Drop/Add form from the Records Secretary in the Student Services Office. This form may be obtained beginning with the first day of classes.
   b. After the student and counselor have properly filled out the Drop/Add form, take the form to the instructor of the class you wish to drop/add for his signature and return the form to the Records Secretary.
   c. It is important to officially drop/add in order that the student may not get an incorrect grade or be attending a class for which he will not get credit.
   d. Should it seem necessary for the student to drop all classes and withdraw from the College, the above procedure should be used so the transcript of classes taken will reflect a proper withdrawal.

STUDENT SERVICES

The College Student Services are designed to aid the student in planning well his college life. The Dean of Students' Office is one which attempts to consider the needs, priorities, and possibilities of each person. Efforts are constantly made to assure each student of his rights and obligations.

COUNSELING

Students will plan each semester's program with the assistance of the counseling staff. However, each student should become familiar with his curriculum requirements. Students planning to transfer should review the graduation requirements not only of Montclair Community College but also of their intended transfer institution. Students are encouraged to discuss their program and vocational/technical goals with the counseling staff and members of the college faculty.

In addition to educational/vocational planning, the counseling staff looks forward to discussing with students the wide range of questions that probe all our lives: questions that tend to tilt life for us socially, personally, or academically.

TUTORING

Those students who, for a variety of reasons, find themselves in need of supplemental instruction will find such aid available. This important function is funded by the College. Veterans should also keep in mind that their G.I. Bill benefits will allow for tutoring in addition to their regular financial entitlements. Students should contact a counselor.

PLACEMENT

The College employs a Placement Counselor whose primary task is to assist students completing training at MCC in finding suitable employment. He also posts job opportunities for people desiring part-time and summer employment. Students should register with the Placement Counselor for quick reference to prospective employers. The Placement Counselor also assists students in proper transfer to other training institutions.

A library of college catalogs is available in the Counseling Office to assist counselors and students in planning proper transfer to four-year institutions.
STUDENT LIFE

The academic and social atmosphere in which a student lives, works, and plays is a vital part of the college experience.

Students, as citizens in the College community, find that a large measure of the management of student affairs is in their own hands. The student body elects representatives to the Student Government, and students actively participate in the maintenance of the discipline that is essential in an academic community, and share in the formulation of other College policies.

The first obligation for responsibility falls upon the student himself. He must devote himself to his academic commitments. A normal load of course work at Montcalm Community College requires 12 to 20 hours of attendance in lectures, recitations, laboratories, or seminars each week. To this must be added the hours of preparation for classwork, to make a total work week averaging 48 hours. The student is obligated to plan his time carefully to meet the level of accomplishment expected in his course work.

The College is well aware that the degree of intellectual capacity, social awareness and cultural appreciation by which the graduating student differs from the entering freshman is a result not only of the student's academic or vocational program but also of all the influences and activities that the student experiences while a member of the College community. This participation may encompass involvement in activities directly relating to the formation of College policies, academic concerns, procedural patterns, and social programs. Theatrical and musical organizations, varied clubs and interest groups, and athletics add other dimensions to student development.

ORGANIZATIONS

The following extracurricular activities are normally available to interested students. It is common for new groups and organizations to be formed each year, and for some to become inactive, depending upon current student interest.

- Archery
- Bridge Club
- Cheerleading
- Choir
- Drama
- Folk-singing
- Intramurals
- Ski Club
- Stage Band
- Student Government

STUDENT CONDUCT

Student life at Montcalm Community College is based on the broad principle of personal honor, and the College insists on high standards of honesty and considerate conduct from each of its students.

STUDENT CODE

Within the limitations which govern an ordered community, the College accords students freedom of inquiry, expression and action. Freedom is not to be interpreted as license, for a corollary of freedom is responsibility.

Citizenship in the Montcalm Community College plan involves respect for the dignity and rights of each individual, respect for public and personal property, and personal and academic honesty.

Since regulations are necessary in any community, guidelines have been established in the form of a Student Code which accords students the greatest possible freedom consistent with the welfare of fellow students and of the institution. Violation of this Code may result in dismissal from the College.
COMMUNITY SERVICES

The Community Services concept is based upon the LIFETIME learning philosophy; that it is possible to learn throughout a person's entire lifetime. Through its community services program, the community college offers a variety of services beyond its well-established degree and certificate programs. Community Services at Montclair Community College provides for self-development and community improvement by offering non-credit short courses, off-campus credit courses, cultural enrichment activities, including a special events series, exhibits, community chorus, community theatre, etc. Other activities include a speaker's bureau, public forums on issues, conferences and workshops, radio programs, services to senior citizens and Manpower Development Training.

Community use of college facilities and campus tours is encouraged. These are to be scheduled through the Office of Community Services.

Community Services constitute a response of the community college to the needs of the community. The complexities of urbanization, minority group problems and racial tension, economic and technological changes, environmental decline, cultural and leisure time needs, and poverty are examples of some of the challenges facing communities. Community Services becomes the cutting edge whereby the community college attempts to meet the challenge of the changing community.

AREA GUIDANCE CENTER

Montclair Community College has an Area Guidance Center which provides services for students at the college and also for adults in the college service area.

The Center has a well stocked library of career and occupational materials, a number of tests including aptitude, interest, and achievement. There is also a trained counselor, who is available on campus during the day, and at area high schools on specified evenings.

If you are interested in career planning, testing for ability or interest, information on over 30,000 job classifications, stop in at the Center which is located on the bottom floor of the administration building at the college. It is open Monday through Friday from 8:00 a.m. to 5:00 p.m. and evenings by appointment.

The Center is funded under a Title III grant. There is no charge for these services.
PROGRAMS OF STUDY

The programs of study offered at Montclair Community College are described below under the general headings: Academic, Basic Studies and Vocational/Technical. These three headings are used here because it is possible for a student to earn an Associate Degree within each grouping. The prospective student will note that this section of the catalog contains only groups of courses leading to certificates or degrees. A detailed description of each course follows in the next section of the Catalog.

PLEASE NOTE: All courses listed in the Programs of Study are identified by a departmental code (examples: LA, TD, etc.) and a course number. Course descriptions appear in the next section of this catalog with departmental codes as follows:

ACADEMIC PROGRAMS

Montclair Community College is dedicated to the idea of providing a variety of program offerings which are designed to allow the students to pursue studies appropriate for their needs and abilities.

The students who wish to pursue the Bachelor’s Degree or beyond may begin their college education at Montclair Community College in a transfer program that is planned to meet specific requirements. For those who wish to prepare for more immediate employment the college offers programs in several occupational fields with technical programs that are designed to this end.

The College recognizes that the student may change his educational goals while attending Montclair Community College. Counselors and instructors will work with the student in selecting a program that best meets his needs.

GENERAL EDUCATION PROGRAM

The heart of the academic program is the general education program which is required for those students earning the Associate Degree in Arts & Sciences.

Courses in the general education program are inter-disciplinary in nature and are designed to provide for the student a broad base of understanding in the area of Communication, Natural Science, Social Science and the Humanities.

It is the goal of Montclair Community College to equip the student to conduct himself as an intelligent citizen in a complex world. Equally important, it is expected that the General Education Curriculum will create a desire for graduates to continue learning beyond their graduation from Montclair Community College.

DEGREE OF ASSOCIATE IN ARTS AND SCIENCES

The following courses are required for all students pursuing the Degree of Associate in Arts and Sciences.

<table>
<thead>
<tr>
<th>Course Title</th>

Total General Education Credits 32

In addition to the above required general education courses the student may complete the degree requirements of twenty-eight additional hours by selecting elective courses from the Academic or Vocational/Technical areas.
TRANSFER PROGRAMS

For the student who wishes to transfer to a four-year institution, Montcalm Community College offers up to two years of many four-year programs.

Listed here are a few of the programs which the student may start at Montcalm Community College and transfer to four-year institutions.

- Accounting
- Biology
- Business Administration
- Chemistry
- Economics
- Elementary Education
- Engineering
- English
- General Education
- History
- Humanities
- Law Enforcement
- Liberal Arts
- Mathematics
- Medical Technology
- Physical Education
- Physics
- Pre-Dentistry
- Pre-Law
- Pre-Medical
- Pre-Optometry
- Pre-Veterinarian
- Psychology
- Public Administration
- Secondary Education
- Secretarial Practice
- Speech
- Zoology

The student who is planning to transfer to a four-year institution should plan carefully with a counselor and utilize the catalog of the college to which he plans to transfer. Careful planning is important so that he fulfills lower division requirements of that college.

It is advisable that the student work with the counseling staff throughout his career at Montcalm Community College to make sure that he is selecting the appropriate courses. It is the responsibility of the student to select these appropriate courses.

BASIC STUDIES

The Basic Studies program provides for certain students, who because of specific occupational or educational experiences or future goals, require an individually structured course of study which is not yet offered in either the vocational/technical or academic programs of the College, to earn an Associate Degree. This curriculum must be approved by the Dean of Students Office.

Degree Requirements include the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Man's Communication</td>
<td>LA100&amp;101</td>
</tr>
</tbody>
</table>

At least one of the following General Education Requirements:

- Man's Social World or
- Man's Physical World or
- Man's Creative World

(see next page)

General Academic electives to total four to six additional academic semester credit hours.

Optional Electives:
1. The remaining 40 to 42 semester hours may be selected from the vocational/technical courses offered by the college, or —

2. An additional General Education Course (as listed above) and four to six academic electives plus additional vocational/technical electives to obtain the necessary sixty semester credit hours required for graduation.

PARA-PROFESSIONAL PROGRAMS

The para-professional is playing an increasingly important role in our society. There are currently three programs of this type being offered at Montcalm Community College. These programs are designed to enable the student to achieve a certificate at the end of one year equivalent of full time study. They may also be pursued on a part time basis. The majority of the courses are transferable to another institution for the student who wishes to pursue further education. It is important, however, that the student consult with a counselor concerning a program for transfer.
CORRECTIONS SPECIALIST CERTIFICATE PROGRAM

The purpose of this program is to provide instruction in the corrections and related academic field for those persons presently employed in the field or for those who have as their goal employment in corrections institutions.

A second year of this program is currently being considered. If it is offered, the courses earned in the certificate program may be applied to the two-year program.

While the majority of the courses are transferable, the student should consult with a counselor if he plans to further his education at another institution.

The following courses are required for the program:

<table>
<thead>
<tr>
<th>Course name</th>
<th>No.</th>
<th>Cr. Hrs.</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Man's Communication</td>
<td>LA100</td>
<td>3</td>

<tr>
<td>(4) Corrections Practicum</td>
<td>SS145</td>
<td>4</td>
</tr>
<tr>
<td><strong>Total Hours</strong></td>
<td></td>
<td><strong>30</strong></td>
</tr>
</tbody>
</table>

(1) It is recommended that an emphasis be placed on report writing for students in this program.

(2) A recommended elective may be substituted with permission from a counselor.

(3) Field experience credit is being explored. It may be necessary to substitute an elective course in lieu of this experience.

(4) This is currently being offered by Michigan Reformatory and Michigan Reformatory and Michigan Training Unit. If the student is unable to take this course, a recommended elective may be substituted.

SOCIAL SERVICE ASSISTANT CERTIFICATE PROGRAM

The Social Service Assistant program has been formulated for the student who is seeking employment with a community service agency. It is also planned as an enrichment experience for those who are currently working in community service agencies. It includes a combination of courses introducing the student to the role and function of social services with related academic studies.

While the majority of the courses are transferable, the student should consult with a counselor if he is planning to pursue further education at another institution.

The feasibility of offering a second year program is currently being investigated. If such a program is adopted the courses required for the certificate program will apply toward the two-year program.

The following courses are required on the Social Service Assistant program:

<table>
<thead>
<tr>
<th>Course Name</th>
<th>No.</th>
<th>Cr. Hrs.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Man's Communication</td>
<td>LA100</td>

TEACHER ASSISTANT CERTIFICATE PROGRAM

The student pursuing this program may find employment possibilities as a teacher assistant, school office assistant, school library assistant and similar positions in education.

A second year program in this area is currently being investigated. If this is adopted the courses required for the one year certificate will be applicable to the two year program.

While the majority of the courses are transferable, the student should consult with a counselor if he is planning to pursue further education at another institution.

The following courses are required for the program:

<table>

</tbody>
</table>

*Those students who have attained a proficiency in typing may substitute another course.

VOCATIONAL/TECHNICAL PROGRAMS

Montcalm Community College since its inception has strived to keep abreast of the needs and desires of students within the service area. Additionally, MCC has been sensitive to the needs of local and regional business and industry for well trained employees. This effort has been made through the participation of members of a General Vocational Advisory Committee and Craft Committees made up of professional and lay persons throughout the MCC service area. The recommendations of these committees have enabled MCC to develop and implement programs of study which not only provide meaningful training and experience in the specialty, but provide the education which is in keeping with the philosophical foundations of the College.

Programs offered at MCC are designed to meet the requirements of the Associate Degree in Applied Arts & Sciences, the two-year Certificate of Achievement, and the one-year Certificate of Achievement. The major emphasis of all programs of study is to provide the knowledge and skill for gainful employment; however, in many instances courses can be considered for transfer to four-year institutions in continuing or related Baccalaureate Degree programs. Many four-year institutions readily accept an individual's Associate Degree for advanced standing in selected programs. Students anticipating transfer to any four-year institution must carefully plan their program accordingly with the assistance of the counseling office.

Students planning to complete the one- or two-year programs are expected to schedule a program planning conference with the counseling staff in order to establish a training plan which is in keeping with individual needs and aspirations as well as program requirements. In some instances, previous training and/or experience can be considered for waiver of required credit. Documentation of such training or experience is essential and must be approved by the Divisional Dean.

The programs of study on the following pages are the basis for awarding of the Degree or Certificate and should be carefully reviewed and understood.

APPRENTICE TRAINING

Admission into the apprenticeship training program is gained by way of employment and/or sponsorship by the employer and contingent upon the development of a training agreement between the employer, employee and the United States Bureau of Apprenticeship and Training. Montcalm Community College coordinates the training plan and provides the related instruction.

The semester in apprentice related instruction is 21 weeks in length with the trainee usually taking two 2-credit hour courses per semester. A competency examination may result in waiver of a required course. Official transcripts of credit may also be used.
Entrance requirements are established by the employer in accordance with existing BAT standards. Continuation of the training program is contingent upon employment status and/or related instruction level of achievement.

Apprenticeship training is presently established for the Tool & Die Maker and Machinery Repairman Trades. Other apprenticeship trades may be pursued providing suitable training plans are established.

ARCHITECTURAL TECHNOLOGY AND CONSTRUCTION TRADES

The architectural trades program provides a broad experience into many fields related to planning and construction. Architectural drafting technicians are trained to think and talk about the problems of construction and to express solutions with the language of the drawing board. Students interested in the construction trades are exposed to a variety of trades, skills, and actual building experience. The architectural student enters at any level of accomplishment and moves ahead to a place of experience and knowledge in accord with his or her desire and ability.

AUTOMOTIVE MAINTENANCE MECHANICS

The Automotive Maintenance Mechanics curriculum provides for the development of the skill and knowledge essential in the performance of the inspection, diagnosis, repair and adjustments of automotive vehicles and Diesel engines. A thorough understanding of the technical principles of operation and maintenance procedures of the modern automobile, its components and accessories is developed through classroom study and intensified live laboratory experience. Included in the program is a study of the Diesel engine and its special properties with the emphasis on maintenance, servicing, diagnosis and repair of Diesel component parts and accessories. Laboratory instruction is performed on modern equipment and live training units. This is a two year Certificate or Associate Degree program.

AVIATION MAINTENANCE TECHNICIAN

The Aviation Maintenance Technician Program is designed to provide the skill and knowledge required to meet the requirements of the Federal Aviation Administration Licenses for the Airframe and Powerplant (A & P) Ratings. This 72-week program of studies is structured to provide the required 1900 clock hours of classroom and laboratory training in compliance with the Air Agency Certificate #CE-8-1. Enrollment in this program is limited and selection of qualified students is based upon academic record, background of experience and/or proficiency examination. The required courses are presented here in a suggested schedule form and beginning students should follow this schedule if possible. A Certificate is awarded upon successful completion of the program. Licensing is the responsibility of the FAA.
## Business Education Programs

### Mid-Management in Retailing

Job entry into the environment of Business is continually requiring a higher level of preparation. This curriculum is prepared to provide the necessary qualifications for entrance above the lowest managerial levels and for advancement to the highest managerial levels. The student is provided with the necessary business skills as well as the theoretical and practical applications of business and industrial management. This is an Associate Degree Program.

### EXECUTIVE SECRETARY

The graduate of the Executive Secretarial Science curriculum will have (1) a knowledge of business technology; (2) a skill in dictation and accurate transcription of business letters and reports. The graduate is prepared to be employed as a stenographer or a secretary. Stenographers are primarily responsible for taking dictation and transcribing letters, memos, and reports. The secretary, in addition to taking dictation and transcribing, is responsible for meeting office callers, screening telephone calls, and assisting the executive. An Associate Degree will be awarded upon successful completion of this program.

Total Credit Hours Required: 66

*Students without high school typing and shorthand must take BE100 and BE101 before placement in these courses.

### STENOGRAPHER

34 credit hours required

This curriculum is planned for the high school graduate who has majored in business and desires advanced studies to perfect his skills, but who can spend only one year in college. A student who had little or no previous business training but wishes to attain and can spend only one year in college may also wish to follow this curriculum. This is a one-year Certificate program.

Total Credit Hours Required: 34

Upon completion of this one-year intensive business program, a certificate of achievement will be awarded. The student may also elect to continue for the Associate Degree, completing the academic and remaining business education requirements his second year.

### CLERK-TYPIST

The demand for skilled and well qualified personnel is rapidly expanding. The objective of the Clerical Office Practice — Clerk Typist curriculum is to prepare persons of any age for employment in a variety of office occupations. This one year certificate program is intended to prepare the student for office occupations which include the development of skills in the use of all office machinery and the knowledge needed to carry on routine office functions. Previous training in typing is desirable. A certificate will be awarded upon successful completion of the program requirements. A student wishing to continue his training may apply credits earned toward the degree program in Secretarial or Management programs.

*BE100 and BE101 may be waived by a competency examination. An elective from the
Academic or Business course offerings must be substituted.

**Note: Sales Management, BE265, may be substituted. Permission of instructor
required.

INDUSTRIAL TECHNOLOGY

This curriculum provides the basic background of laboratory and related theory
courses to acquaint the student with the technical needs of industry. Students are given
training in machine tool operations and physical and metallurgical testing equipment.
Mechanical courses are accompanied by courses in technical mathematics, drafting,
physics, electronics, hydraulics, production problems and materials of industry.

Manufacture, sale and operation of mechanical equipment, machines and machine
tools is a large and diversified industry with excellent opportunities for those with the
proper aptitude and ability. A thorough technical training course accompanied by a good
background of industrial experience is a real stepping stone to advancement. This is a
two-year program with an Associate Degree awarded upon successful completion.

PRACTICAL NURSING

After completion of this forty-four week program, students are qualified to take the
Michigan Board of Nursing Examinations to become licensed to practice. This program
is conducted with the approval of the Michigan Board of Nursing.

Montcalm Community College is affiliated with three area hospitals. They are
United Memorial Hospital in Greenville, Carson City Hospital, and Kelsey Memorial
Hospital in Lakeview. Each student will spend time at each hospital for specific clinical
experience.

The student will also be exposed to public health nursing in cooperation with the Mid-
Michigan District Health Department.

Requirements for Admission:
1. Men and women applicants must be 17 years old. The usual maximum age is 55. All
applicants will be considered individually.
2. All applicants must be high school graduates, or the equivalent. Applicants without
high school diplomas must pass the GED test, equivalent to the 12th grade level.
3. All applicants are required to be in good physical and mental health, within normal
weight for height and age. Physical, dental and x-ray examinations are done by own
physician and dentist.
4. All applicants are required to take the FSB screening battery which is scheduled
through the Dean of Students Office.
5. All applicants must schedule a personal interview with the Director of Nursing or a
member of the nursing staff.

First Semester (Pre-Clinical)

Clinical practice takes place the first semester. However, the main emphasis is on
classroom studies.
TOOL & DIE DESIGN

Tool and Die Design prepares the student for gainful employment in a tool design division of engineering and many other engineering related occupations. The training specializes in jig and fixture design, sheet metal die design, and plastic mold design. The design program is preceded by basic drafting techniques, advanced projection (descriptive geometry) and jig and fixture detailing. The program is designed to be terminal at the completion of two years at MCC with the student having vocational skills to obtain gainful employment in engineering and many other related occupations, or transferable to a four-year college or university with the student pursuing a Baccalaureate Degree in trade technical teacher education, industrial technology, industrial supervision, tool engineering, mechanical technology, mechanical design, or engineering graphics. The student may choose to receive either a Certificate or Associate Degree upon successful completion of the program, depending on the general education electives.

WELDING PRACTICES

Welding is a skill which is essential to many industries. This program stresses the development of technique and understanding of quality weldments. Effects of heat and stress on welded materials are studied and practices in the laboratory. The student may develop sufficient skill for AWS certification and receive the Certificate of Achievement upon successful completion of program requirements which follow.

COURSE DESCRIPTIONS

In this section descriptions of all courses offered at Montclair Community College are given. These are listed alphabetically.

Numbers in the parenthesis ( ) which follow course titles represent the total credits, hours of lecture/demonstration, and hours of laboratory in that order. For example, in the first course listed below, four semester hours of credits are given for the course, two of the four hours will be lecture/demonstration, and two of the four hours will be laboratory-type classes. In some cases the instructor may designate additional hours of laboratory as being necessary.

ARCHITECTURAL TRADES

AT110 Construction Methods and Materials I (4, 2, 2) Fall Semester
This course relates materials used by the construction industry to the function they perform. The physical properties and applications of masonry, wood, steel and synthetics is related directly to assembly with consideration to local and federal codes.

AT111 Construction Methods and Materials II (4, 2, 2) Spring Semester
A lecture/laboratory experience in foundation work, carpentry, and framing, and the use of power tools. The student is exposed to actual materials either under simulated or real working conditions.

AT120 Architectural Construction I (9, 3, 12)
A practical course involving full scale construction of a residential or commercial building using modern materials and methods. Students will have assembly experience in carpentry, plumbing, heating, wiring, masonry, and finish work. First semester is devoted primarily to framing, exterior covering and closing against the weather.

AT121 Architectural Construction II (9, 3, 12)
A continuation of AT120 involving all interior utility installation and finish decorating. The latter part of the course involves foundation and basement construction for the coming fall project.

AT130 Architectural Drafting I (Detailing) (7, 4, 8) Fall Semester
This course begins with a review of standard drawing techniques and proceeds through a logical sequence of structural detailing. Basic principles are presented in the use and rendering of modern materials and methods of construction.

AT131 Architectural Drafting II (Residential Planning) (7, 4, 8) Spring Semester
A continuing course in architectural and construction principles relating primarily to residential design. This course stresses such elements as modular coordinates, floor planning, utility placement, and exterior design for the draftsman, builder, or home owner. Prerequisite AT130 or by arrangement.
AT150 Architectural Mathematics (3, 3, 0) Spring Semester
This course is specifically designed to relate functionally with the mathematical computations required of the architectural draftsman and the construction technician. Lecture, demonstration, and practice with exemplary problems is given. Computation of material quantities, estimating and construction cost analysis is experienced by the student.

AT200 Architectural Drafting III (Mechanical Systems) (6, 4, 5) Fall Semester
This course primarily covers service systems of a habitable structure. The student designs and illustrates typical pre-fab and on-site service systems and makes correlated computations.

AT201 Architectural Drafting IV (6, 4, 5) (Steel & Concrete Structures) Spring Semester
This course deals with the design systems in use for large, fireproof structures made primarily of concrete and steel. Knowledge and drawing techniques are gained in floor systems, roof decks, curtain walls, and structural framing. Graphic and perspective illustrations are a part of the students' final design project.

AT202 Special Problems Seminar (5, 2, 4)
A course for the advanced student who wishes to expand his or her architectural experience in a particular area of concentration. Projects and instruction are largely of an individual or small group nature. Opportunity is provided for independent study of methods and for the rendering of innovative and special design. Prerequisite: AT131.

AT210 Trades Crew Management (4, 2, 2) Fall Semester
A one or two semester course for the student who desires to gain training and experience in the management of personnel. Experience is gained in planning, procurement, and the allocation of job responsibilities. This course is particularly applicable to the person with leadership and managerial inclination leading toward such job descriptions as contractor or group leader. Leadership trainees also function as liaison personnel between the AT120 construction project and the architectural designing class.

AT211 Trades Crew Management II (4, 2, 2) Spring Semester
Continuation of AT210.

AM130 Automotive and Diesel Engines, Clutches and Transmissions (11, 4, 12) Fall Semester
This course covers instruction in theory, laboratory procedures, diagnosis and operations for automotive engines and Diesel engines, clutches and standard transmissions. Shop work consists of the overhaul or rebuilding of engines, clutches and standard transmissions. All popular engines are covered, including the study of the gas turbine and the Wankel engine.

AM311 Automotive Fuel, Ignition and Emission Control Systems (11, 4, 12) Spring Semester
This course is designed to develop the student's abilities as a diagnostician or tune-up man. Diagnosis is stressed on actual problems. The student receives an in depth study of fuel, carburetion, starting, charging, standard ignition, electronic ignition and emission controls systems.

AM330 Automotive Chassis and Automatic Transmissions (11, 4, 12) Fall Semester
This course covers front end alignment, brakes, steering, drive line, differentials and automatic transmissions. Laboratory experience involves diagnosis and repair on live late model units using latest methods on modern equipment.

AM331 Automotive Air Conditioning and Advanced Emission Control (3, 1, 2) Spring Semester
The theory, servicing and diagnosis of automotive air conditioning units is covered in depth. Laboratory experiences are on live units using modern equipment in both areas. Advancements in emission controls are studied in depth as new systems are introduced.

AM232 Automotive Parts Management (2, 2, 0) Spring Semester
This course provides an in depth study of the operation and management of the Automotive replacement parts section of the Automotive Trades. Familiarization with parts coding along with inventory control, pricing, and sales techniques constitutes a major part of the course. Included in the course are the fundamentals of bookkeeping and the handling of currency as it applies to parts management and sales. Parts coding systems and unique features of all major automobile manufacturers in the United States as well as popular foreign car makers will be included.

AM233 Automotive Service Management (2, 2, 0) Spring Semester
A comprehensive course in the management of the Service Department of the Auto Dealership or Service garage. The major emphasis of the course will be on the accurate diagnosis of automobile defects, cost estimating, quality control, personnel management, scheduling, and customer relations. All aspects of service management will be explained and practiced through simulated and actual service procedures.
AVIATION MECHANICS

AV101 Introduction to Aviation (1, 2, 0) Fall Semester
An introductory course including aircraft nomenclature, theory of flight, and principles of aircraft maintenance and repair.

AV102 Airframe Nonmetal Structures (3, 2, 3) Fall Semester
This course studies the repair of wood structures, fabric coverings, and the application of aircraft finishes.

AV103 Airframe Sheet Metal Structures (6, 4, 6) Fall Semester
This course studies the repair of sheet metal structures, including various types of fasteners, plastics, honeycomb, and interior furnishings.

AV104 Aircraft Welding (3, 1, 3) Fall Semester
This course is designed to provide the student with skills for soldering, brazing, gas-welding, and arc-welding. It will also provide the student with an understanding of the procedures for welding magnesium and titanium.

AV105 Basic Science (3, 3, 2) Fall Semester
This course is designed to provide the student with a basic understanding of electricity, physics, and basic mathematical skills.

AV111 Airframe Assembly and Rigging (3, 2, 2) Spring Semester
This course provides the student with an understanding of the method of assembly and rigging of both rotary-wing and fixed-wing aircraft, including alignment of structures and the balancing of movable surfaces.

AV112 Hydraulic and Pneumatic Systems (6, 4, 6) Spring Semester
This course is designed to provide the student with an understanding of hydraulic and pneumatic power systems and the components, including a study of landing gear systems.

AV113 Aircraft Electrical Systems (4, 3, 4) Spring Semester
This course will provide the student with an understanding of aircraft electrical system operation and the repair of electrical system components. Prerequisite: AV105

AV114 Aircraft Instruments and Controls (4, 2, 4) Spring Semester
This course includes the study of cabin atmosphere control systems, instrument systems, communication and navigation systems, and position and warning systems.

AV115 Aircraft Fuel Systems (3, 2, 3) Spring Semester
This course is a study of aircraft fuel system requirements, fuel systems, fuel system components, and the repair of fuel systems and their components.

AV116 Materials and Processes (4, 2, 5) Fall Semester
This course includes the study of nondestructive testing methods, heat-treating processes, aircraft hardware, and methods of cleaning and controlling corrosion.

AV201 Aircraft Reciprocating Engines (5, 4, 4) Fall Semester
This course studies the aircraft piston type engine including the engine parts and their function. The course will also study engine displacement, compression ratio and horsepower.

AV202 Metal Processing (3, 2, 3) Fall Semester
This course includes a study of hand and power tools used in shaping and processing of metal.

AV203 Engine Electrical Systems (4, 3, 3) Fall Semester
This course studies the engine electrical system, its components, and the repair of these components. The course also studies engine instrument systems and fire protection systems.

AV204 Engine Lubrication Systems (3, 2, 2) Fall Semester
This course studies the sources of lubricants, their use, and engine lubricating systems.

AV205 Aircraft Drawings (2, 1, 2) Fall Semester
This course will include the study of basic drawing procedures, making sketches, and reading blueprints, graphs and charts.

AV211 Aircraft Reciprocating Engine Overhaul (5, 3, 5) Spring Semester
This course studies the overhaul procedures for conducting a major overhaul on a reciprocating engine and the procedures for removing and reinstalling an engine on an aircraft. Prerequisite: AV201

AV212 Aircraft Engine Ignition Systems (3, 2, 4) Spring Semester
This course studies the operating principles of the aircraft magneto, its overhaul and the repair and replacement of ignition harness. A study of the turbine engine ignition system is also included.

AV213 Engine Fuel Induction Systems (5, 3, Spring Semester
This course studies the operation and overhaul of float and pressure carburetors along with fuel injection and turbine engine fuel metering systems. The student will also study engine fuel systems, induction systems, including superchargers, engine cooling systems and engine exhaust systems.
AV214 Turbine Engines (3, 2, 2) Spring Semester
This course is designed to provide the student with a basic understanding of the
type of operation, disassembly and reassembly of jet engines as well as
operating procedures and trouble-shooting practices.

AV215 Aircraft Propellers (4, 2, 4) Summer Semester
This course includes a study of the operation and repair of fixed pitch, constant
speed and feathering propellers.

AV216 Aircraft Servicing (5, 2, 5) Summer Semester
This course covers the requirements for making an airframe and powerplant
conformity and airworthiness inspection. The course also includes instruction
in ground operations, servicing, maintenance forms and records, maintenance
publications, and mechanics privileges and limitations. Prerequisite: All AV
courses except AV215, AV217 and AV218.

AV217 Weight and Balance (2, 1, 2) Summer Semester
This course studies the procedures for determining the balance of the aircraft.
Finding the center of gravity and the moment of the center of gravity with changes in
loading.

AV218 FAA Review (2, 2, 0) Summer Semester
This course is a review of all previously taught subjects designed to prepare the
student to take the FAA written, oral and practical examinations for both the
airframe and powerplant mechanics licenses. Prerequisite: All AV
courses except AV215, AV216 and AV217.

BUSINESS EDUCATION

BE100 Beginning Typing (3, 1, 3) Fall and Spring Semester
This is an introduction to and a mastery of the typewriting keyboard. Personal
and business letters, elementary tabulation, simple outlines, and manuscript
writing are included.

BE101 Intermediate Typing (3, 1, 3) Fall and Spring Semester
The writing of business letters with practice in proofreading, tabulation, special
communication forms and reports, application and employment procedures.

BE103 Beginning Shorthand (4, 3, 2) Fall and Spring Semester
A course in the elementary principles of Gregg Shorthand.

BE104 Intermediate Shorthand (4, 3, 2) Fall and Spring Semester
Intensive training in theory of shorthand, the development of shorthand
outlines, and development of the ability to take new matter dictation.

BE115 Accounting I (3, 3, 0) Fall and Spring Semester
An introduction to accounting and fundamentals; the meaning and purpose of
accounting statements, balance sheets, and profit and loss statements. The
theory of debits and credits; accounts payable and receivable; the trial
balance; adjusting and closing entries; accounting for notes, interest, unearned
and accrued items are examined.

BE116 Accounting II (3, 3, 0) Fall and Spring Semester
The valuation of receivables and merchandise inventory, valuation of fixed
assets and depreciation, accounting for taxes, payroll, property, and sales tax
are covered. An introduction to corporation and cost accounting is included.

BE117 Clerical Accounting (3, 3, 0) Fall and Spring Semester
This course, designed primarily for students on a secretarial/clerical program,
covers the basic terminology and fundamental principles of accounting. Most of
the emphasis is on the practical business applications of the materials covered,
with major consideration given to the preparation of accounting statements,
balance sheet and income statement.

BE120 Business Mathematics (4, 4, 0) Fall and Spring Semester
This course reviews fundamental arithmetic processes and their business
applications and includes cash and trade discounts, mark-ups, depreciation and
interest, and payroll deduction.

BE122 Financial Math (3, 3, 0) On Demand
This course covers simple and compound interest; ordinary and deferred annu-
ities, and perpetuities; amortization and depreciation; bonds and insurance.

BE130 Business Correspondence (3, 3, 0) Spring Semester
A study of effective correspondence in business. Prerequisite: BE100.

BE131 Report Writing (3, 3, 0) Spring Semester
The student is introduced to the what and why of business reports, problems
and planning, research, organizing information, constructing and writing a
report in an acceptable manner.

BE135 Introduction to Business (3, 3, 0) Fall Semester
The student is introduced to the environment, nature, and opportunities of
business. Types of ownership are covered and the operation of business is in-
vestigated through marketing, location and layout, personnel, finance, and
controls for decision making. The legal environment of business is also in-
vestigated.

BE200 Business Law (3, 3, 0) Fall Semester
Law and Society, the Uniform Commercial Code are considered with emphasis
placed on the law of contracts, sales, and real property. Case studies are used
extensively.

BE202 Advanced Typing (3, 1, 3) Spring Semester
Continued speed-building techniques; advanced production typewriting
techniques; skill in business letters, tabulations, manuscript writing, legal
documents, and business forms.

BE203 Advanced Shorthand (4, 3, 2) Spring Semester
Further development of the ability to write new-matter dictation with in-
creasing emphasis on speed and accuracy in transcription.
BE204 Dictation and Transcription (4, 3, 2) Fall and Spring Semester
This course stresses development of skills in typing, shorthand, and English grammar that are necessary for efficient transcription as well as the development of shorthand vocabulary in medical, legal, and technical terms.

BE220 Voice Transcription (4, 2, 3) Fall and Spring Semester
Development of voice transcription skill is stressed with the operation of beltype transcribers. Emphasis is placed on typing skills and technical English skills for efficient transcription.

BE230 Typing and Office Office Practice (3, 1, 4) Spring Semester
A course in which subject matter and skill development are drawn together in practical application.

BE233 Merchandising I (3, 3, 0) Fall Semester
The student is introduced to marketing with special emphasis upon retailing. Establishing, financing and organizing the new store and buying and selling with special attention given to promotion are major topics in the course.

BE234 Merchandising II (3, 3, 0) Spring Semester
A continuation of BE233 with emphasis placed upon control of the operation. Prerequisite: BE233 or equivalent.

BE235 Small Business Management (3, 3, 0) Spring Semester
A study of the operation of small business. Included in the course are topics dealing with organization, financial structure, record keeping and promotion of small business. Also included are topics dealing with salesmanship, personnel relations, customer psychology, and business law.

BE236 Production Management (3, 3, 0) On Demand
The management functions as applied to the production of products. The inputs of capital, labor, design, and purchasing are covered with emphasis upon the process including all types of control.

BE237 Management (3, 3, 0) Fall Semester
This course treats all activities in the field of business. Each facet of business, such as ownership, organization, marketing, physical factors, purchasing, production, personnel, finance, quantitative control, and government regulations. The development and installation of a total information system for managerial decisions is investigated.

BE238 Money and Banking (3, 3, 0) On Demand
The nature and origins of money and credit; the history of banking institutions, with emphasis upon the Federal Reserve System; along with statutory controls of money, credits and banks are studied.

BE240 Business Machines (4, 3, 4) Fall and Spring Semesters
A course designed to train the student in the fundamental processes of key-driven calculators, adding-machine, rotary calculators, listing calculators, and ten-key machines.
FOREIGN LANGUAGES

FL120 Elementary French (4, 4, 0)
Fundamental training in basic language skills stressing oral and written expression as well as aural comprehension. Open to students with no French background or one year of high school French. Students electing this class should plan to take FL121 second semester.

FL121 Elementary French (4, 4, 0)
A continuation of French 120. Prerequisite: 120 or equivalent.

FL220 Intermediate French (4, 4, 0)
Prerequisite: French 121 or successful completion of two years of high school French. Advanced conversation and readings emphasize vocabulary building, French syntax, aural comprehension and phonetics.

FL221 Intermediate French (4, 4, 0)
Prerequisite: French 220. A continuation of French 220 with emphasis on gaining greater fluency through advanced French conversation and enrichment reading from French literature and current periodicals.

FL130 Elementary Spanish (4, 4, 0)
An introductory course in the Spanish language with emphasis upon grammar, vocabulary, diction, and conversation. There will be considerable use of tape and disc recordings in the Listening Center.

FL131 Elementary Spanish (4, 4, 0)
A continuation of FL130. Prerequisite: Spanish 130 or equivalent.

FL230 Intermediate Spanish (4, 4, 0)
The second year of collegiate Spanish with greater emphasis upon conversation and reading of Spanish literature. Diction and vocabulary study will also continue. Prerequisite: at least two years of high school Spanish or LA155.

FL231 Intermediate Spanish (4, 4, 0)
A continuation of FL230. Prerequisite: FL230.

HUMANITIES

HU110 Music In The Elementary Classroom (3, 2, 1)
This course is designed to give the student a knowledge of a well rounded music program for the elementary grades. Stress is placed on creative experiences, use of appropriate materials and methods pertinent to the elementary classroom.

HU220 Introduction To Art (2, 1, 2)
The purpose of this course is to introduce the student to the varieties and types of materials for individual and classroom use.

HU191, Choir (1, 1, 0)
192
Offers student, interested in the performing arts, an opportunity to further develop his musical talents. The choir performs at several campus and community events throughout the academic year. Opportunity is also provided to perform with small vocal ensembles whose members are selected from choir personnel.

-HU200 Man's Creative World (4, 4, 0)
The purpose of this course is to develop the students understanding of the artistic, literary and philosophical nature of man. Viewed historically, selected topics integrate material from the fields of art, literature, music, philosophy and religion.

-HU201 Man's Creative World (4, 4, 0)
Continuation of HU200. Emphasis on the modern historical development of thought in art, literature, music, philosophy, and religion.

-HU215 Music Literature (3, 3, 0)
A comprehensive course in which selected works by major composers past and present, are studied. Recordings of various musical forms, including the symphony, concerto, tone poem, opera and chamber music, will be used in the class to build a basic listening repertory. The fundamentals of music, including meter signatures, accidentals, treble and bass cleffs, note and rest values, and circles of fifths, will be introduced. Students will be expected to attend various concerts throughout the semester.

-HU220 Introduction to Philosophy (3, 3, 0)
Designed to acquaint the student with some fundamental questions concerning the nature of man and the way in which these questions have been dealt with by the most profound thinkers of the past and present.

-HU225 Art In The Elementary Classroom (2, 2, 0)
The purpose of this course is to emphasize the role of art in the elementary classroom and its role in contributing to the creative development of the child.

INDUSTRIAL TECHNOLOGY

TT110 Machine Operations (9, 3, 12)
This course is machine shop orientation to familiarize the student with hand tools, operations, and basic machine tool processes, care of tools and equipment, and shop safety.

TT111 Machine Operations II (9, 3, 12)
This course is advanced operation on grinders, shapers, mills, presses, and lathes. The student will be trained to perform all operations required from the beginning to completion of the job. Prerequisite: TT110 or special arrangement.
### LANGUAGE ARTS

**LA100 Man's Communication (3, 3, 0)**

The purpose of this course is to introduce the student to the nature and function of the English language. The student will attain a basic competency in oral and written communication.

**LA101 Man's Communication (3, 3, 0)**

The purpose of this course is to develop the student's ability to analyze the various processes of formal and informal communication and to improve his ability to recognize and utilize effective argumentative and expository prose. Second Semester. Prerequisite: LA100 or by examination.

**LA120 Introduction to Audio-Visual and Library Services (2, 2, 0)**

This course has two major purposes: (1) To acquaint prospective teachers and teacher aides with the operation and simple repair of audio-visual equipment (2) To familiarize students with the function of the library in the school setting and principles and techniques of managing a school library. (Field trips are planned to local school libraries)

**LA150 Reading Lab (1, 2, 0)**

This course is designed to increase reading speed and comprehension in addition to rectifying various deficiencies of the students. The laboratory exercises will be adapted to the needs of the individual. The course may be repeated as many times as is deemed necessary, but a maximum of two credits will be allowed.

**LA160 Journalism (3, 3, 0)**

An introduction course which includes the basic techniques of writing, the principles of effective news writing; a survey of newsroom organization and practical experience provided through laboratory sessions.

**LA161 Journalism Lab (1, 0, 2)**

Practical experience on the College Newspaper, The Post.

**LA162 Journalism Lab (1, 0, 2)**

Advanced practical experience on the College Newspaper, The Post, emphasizing editorial and feature writing techniques. A maximum of two credits for LA161-162 will be allowed.

**LA200 American Thought and Literature (3, 3, 0)**

A survey of American Literature including complete works by several authors selected to represent major movements, both literary and historical, and many shorter pieces from each literary genre, with emphasis on the 20th Century.

**LA201 American Thought and Literature (3, 3, 0)**

A survey of American Literature from each literary genre, with emphasis on the literature and thought prior to the 20th Century.

**LA210 Speech (3, 3, 0)**

Speech 210 is an introductory course in public speaking, designed mainly to provide practice in speaking with interest and purpose before an audience. Through presenting a series of brief talks before his peers, the student will become familiar with the basic principles of speech organization, preparation, and delivery.

**LA212 Oral Interpretation (3, 3, 0)**

Through analyzing and reading aloud selected prose, poetry, and drama, the student will improve his own understanding of these works, and increase his ability to communicate to others. The course will relate interpretative reading to the other areas of speech: Public address, television, theatre, speech improvement, and the teaching of literature.

**LA220 English Literature from the Beginnings to 1798 (3, 3, 0)**

A systematic study of English Literature which stresses the principal authors and their works. Reading and discussion will include representative writings of the period from the beginning to the end of the eighteenth century, and will also survey current critical approaches.

**LA221 English Literature from 1798 to the Present (3, 3, 0)**

A systematic study of English Literature which emphasizes the principal authors of the nineteenth century and twentieth century. Reading and discussion will include representative works and will also review current critical attitudes.

**LA230 Short Story (3, 3, 0) 1st Semester of Even Years**

A study of the strengths and limitations of this genre in which the student learns to read with delight and understanding. Prerequisites: In general, this course should be open to students who are willing to work at a sophomore level.

**LA240 The Novel (3, 3, 0) 1st Semester of Odd Years**

A study of the novel, with dual intent: Through systematic discussion of each novel to increase the rewards one receives from reading it and, through study of the several schools of literary criticism, to better understand how the "more than casual" reader approaches fiction.

**LA250 Creative Writing (3, 3, 0)**

The purpose of this course is to allow the student to sharpen his ability to use the English language in expressing creative thought in any or all of the traditional genres. The student will be encouraged to greater achievement in types of writing he has already tried and will be expected to attempt work in new areas. A workshop atmosphere with common exchange of ideas will prevail.

**LA260 Drama (3, 3, 0) 2nd Semester of the Odd Years**

An introduction to drama as a literary form. The student will read representative writings of the period from classical times to the present.
LA270  Poetry (3, 3, 0)  2nd Semester of the Even Years
Contemporary and modern examples of poetry are compared to historically
durable examples on points of structure and content.

LA280  A Survey of Black American Literature (3, 3, 0)
A chronological survey of Black American writing from 1780 to the present,
with emphasis on twentieth century examples of poetry, fiction, drama, and
autobiography.

LA296  Children's Literature (3, 3, 0)
A survey of literature for children in the elementary grades, aimed at
developing techniques for using books with children, story telling, and the
criteria for book selection.

MATHMATICS

MA100  Elementary Algebra (3, 0, 3)
A review of the properties of the basic number systems, using the tools of
beginning algebra. Additional topics include first degree equations and
inequalities, special products and factoring, graphs and linear systems,
radicals and quadratic equations. Prerequisite: none.

MA102  Trigonometry (3, 3, 0)  2nd Semester of Even Years
The right triangle is studied to introduce the students to the trigonometric
functions. Further topics include trigonometric identities, addition formulas,
laws of sines, law of cosines, complex numbers and De Moivre’s Theorem.
Prerequisite: one and half years of high school algebra and one year of high
school geometry.

MA104  Intermediate Algebra (3, 3, 0)
This course will provide students with the algebraic skills, including
manipulation and proofs, necessary for the study of college algebra and
analytic geometry. Topics covered include the usual topics through quadratics
plus the exponential and logarithmic functions, the binomial theorem,
sequences, systems of equations, complex numbers, permutations, and com-
binations with an introduction to probability.

MA151  Math for Elementary Teachers (3, 3, 0)  Fall Semester
To provide the elementary teacher with the necessary background to teach
mathematics in the elementary school. Such subjects as the origin of systems
of numeration, sets, systems of whole numbers, bases other than ten, systems of
integers, rational and real numbers will be discussed.

MA152  Geometry for Elementary Teachers (3, 3, 0)  Spring Semester
This material presents a survey of geometry; formal and informal, metric and
non-metric, Euclidean and non-Euclidean. Topics include points, planes,
parallels, congruence, measures and an introduction to vectors. Prerequisite:
MA151 or equivalent.

MA159  College Algebra (3, 3, 0)  Fall Semester
Topics covered include the quadratic equation, sequences and series, complex
numbers, De Moivre’s theorem, synthetic division, mathematical induction,
combinations and permutations. Prerequisite: Trigonometry.

MA160  Analytic Geometry (3, 3, 0)  Spring Semester
The straight line, the circle, conics, algebraic curves, transcendental curves,
parametric equations, planes and lines, and quadratic surfaces. Prerequisite:
MA159 or equivalent.

MA190  Elementary Statistics (3, 3, 0)  2nd Semester of Odd Years
This course is designed to introduce students to basic statistical techniques.
Topics studied include mean, standard deviation, frequency, probability,
binomial distribution, the normal curve, sample means, confidence limits,
hypothesis testing, chi-square, linear correlation, and regression. Each topic is
introduced with examples and problems. Practice in the use of appropriate
tables will be sufficient to insure confidence in their use.

MA200  Man’s Mathematical Methods (4, 4, 0)  1st Semester of Even Years
The purpose of this course is to develop the student’s understanding of the basic
concepts of modern mathematics. The course will cover sets, functions,
relations, and mathematical systems — including groups, real number
systems, and quadratic equations. Prerequisites: Mathematical maturity
equivalent to traditional high school geometry.

MA250  Calculus I (4, 4, 0)  Fall Semester
Functions and continuity, limits differentiation, applications, integration and
the definite integral with applications. Prerequisites: Mathematical maturity
equivalent to traditional high school geometry.

MA251  Calculus II (4, 4, 0)
Logarithms and exponentials, arc length, polynomials, partial fractions,
Taylor’s series. Special methods of integration, partial differentiation.
Prerequisite: Math 250 or equivalent.

MA259  Differential Equations (3, 3, 0)  1st Semester of Odd Years
Linear equations, the Bernoulli Equation, existence and uniqueness theorems,
applications equations of first order and high degree, Clairaut’s equation,
solution by power series, an introduction to Laplace transform, Strum’s
theorem. Prerequisite: One year of Calculus.

NATURAL SCIENCES

NS100  Man’s Physical World (4, 3, 2)  Freshman Year
The purpose of this course is to provide a basic general education in the major
science areas (Astronomy, Geology, Physics, and Chemistry) so that the
student will better be able to understand and evaluate the results of scientific
technological achievement and their impact upon society. It also provides a
basis for the student to evaluate his or her own interest and potential in physical
science. No prerequisites.
NS101 Man's Physical World (4, 3, 2) Freshman Year
This course is a follow-up to NS100, Man’s Physical World. It provides a basic
general education in the major biological sciences (Biochemistry, Botany,
Ecology, Genetics, and Zoology) and also a basis for the individual to relate to
his total environment. Like NS100, it presents an opportunity for the student to
evaluate his or her own interests and potential in a biological science.
Prerequisite: NS100 or permission of instructor.

NS102 Physical Geography (3, 3, 0) (Earth Science)
A study of the earth-sun relationships, climatic factors on the earth, the
geographic grid, land forms and rocks and minerals. Opportunity will also be
provided to gain skills in map reading. The course will also include the study of
the earth’s natural resources and the part played by man in the depletion of
these vital materials.

NS200 Botany (4, 3, 2) First Semester
A survey of the plant kingdom from the simplest to the more complex. Studies
of structure, classification, physiology, and ecological relationships as well as
economic values of the plant kingdom, shall be considered. Students will have
an opportunity to submit a collection from the local flora and special attention
will be given to taxonomic principles and collection procedures along with the
use of keys. Prerequisite: NS100-101 or permission of the instructor.

NS305 Zoology (4, 3, 3) Second Semester
A general survey of the animal kingdom including comparative studies of the
structure, function, and behavior of representative animals. The anatomy and phylogeny of the human will be emphasized in the study of
mammals. Prerequisite: NS100 or permission of the instructor.

NS220 General Chemistry (4, 3, 4) First Semester
Fundamental theories, principles, and problems of chemistry will be empha-

NS221 General Chemistry (4, 3, 4)
A continuation of NS220. Organic and biochemistry will be introduced in the last
half of the semester. Prerequisite: NS220.

NS222 Organic Chemistry (5, 4, 3)
The chemistry of carbon compounds and their derivatives with emphasis on
nomenclature, fundamental principles, reactions, and reaction mechanisms.

NS233 Organic Chemistry (5, 4, 3)
A continuation of Chemistry NS222 and including stereochemistry and organic
compounds of biological interest.

NS225 College Physics I (4, 4, 2)
An introductory course in mechanics, heat, and sound. This is a technical course
designed for those majoring in engineering or science. Calculus should be taken
concurrently.

NS226 College Physics II (4, 4, 2)
A continuation of NS225. Light, electricity and magnetism, and modern physics
will be considered. Calculus should be taken concurrently.

PHYSICAL EDUCATION

PE101 Golf (1, 0, 2)

PE103 Weight Lifting (1, 0, 2)

PE104 Archery (1, 0, 2)

PE106 Diversified Activities (1, 0, 2)

PE121 Sports Officiating (2, 2, 0)
This course presents the rules of major sports, officiating techniques, relationship
with players and school officials, game administration, major emphasis is to stimu-
late young men into becoming registered officials with the state association.

PRACTICAL NURSING

PN100 Nursing Foundations (3, 4, 3)
This course provides the nursing student with the information and skills
necessary to build a foundation for efficient bedside nursing. Students not only
gain skill in procedures they are to perform, but also increase their ability to
deal with patients and members of the health team.

PN110 Food in Health and Disease (2, 2, 0)
Basic nutrition facts are presented with their relationship to health. The student
becomes familiar with food nutrients, good nutrition, malnutrition, and
variations of diet therapy.

PN120 Personal and Environmental Health (2, 2, 0)
The person as a nurse is studied in this course. Who she is, and what in nursing
history and education has evolved present her role as a member of the nursing
profession. The student will be introduced to preventive medicine, laws of
sanitation, the community health team and each member's role in meeting the
total needs of its citizens.

PN130 The Living Body (7, 6, 2)
This course introduces the student to the study of the human body structure,
dynamics and functions, and disease. The concept of the dependence of one
system on another and the contributions of each system to the well-being of the
body is stressed.
PN140 Human Growth and Behavior (3, 3, 0)
The developmental processes of the human being are studied with emphasis on early childhood development and the child-parent relationship. Nursing skills essential to the care of children and the study of the more common disease conditions are also presented. Training will include the care of the pediatric patient.

PN200 Maternal and Child Health (3, 2, 2)
This course teaches the student facts about pregnancy, prenatal care, and the care of the newborn infant and gives an understanding of the complications and related care and treatment.

PN210 Rehabilitation Nursing (3, 2, 2)
The principles and practices of rehabilitation nursing aspects including crutch walking, transfer techniques, and bed positioning are taught. Special emphasis is placed on changes which occur during the process of aging, both physiological and mental. Also explored are recreational and diversional activities in relation to the patient’s recovery and peace of mind.

PN220 Nursing the Patient in Health and Disease (7, 3, 8)
Medical-Surgical nursing presents the more common medical and surgical conditions and the nursing techniques and skills involved in providing nursing care. The course is intended to present the concept of meeting the total needs of the patient and a return to normal functioning life.

PN230 Introduction to Medicines (4, 3, 1)
This course offers beginning instructions in pharmacology and safety factors essential to dosages and drug administration. The practical nurse must take further post-graduate study to be a medications nurse.

PN240 Nursing of Adults and Children (4, 6, 8)
Each student will be working in the clinical area. Each student will be assigned clinical areas to gain in nursing skills essential to the care of each individual patient.

PN281 Basic Concepts of Pharmacology and the Administration of Medicines (4, 4, 2)
(Open only to Licensed Practical Nurses)
This course is sponsored by Montcalm Community College with the approval of the National Association for Practical Nurse Education and Service, Inc. (NAPNES). This continuing education program will prepare L.P.N.’s with the knowledge, techniques, and attitudes pertaining to drugs and their administration that are essential for carrying out their nursing responsibilities.

Only applicants which have passed the pre-entrance math test (arranged by MCC) and the National Pharmacology Final Test will be issued a certificate from NAPNES. (90 clock hours of instruction, 90 clock hours of clinical experience).

SOCIAL SCIENCES

SS100 Man’s Social World (4, 4, 0)
This course is designed to introduce the student to the interdisciplinary approach to the study of the development of human behavior. Emphasis will be placed upon those concepts and theories which have influenced man’s thinking about his individual nature and social relationships. (Materials from the following disciplines will be utilized: History, Anthropology, Sociology, Political Science, Psychology, and Economics.)

SS101 Man’s Social World (4, 4, 0)
This course is a continuation of SS100. It is designed to study those patterns of behavior which have led to the creation of forces that have shaped modern society. Emphasis will be given to specific problem areas which confront contemporary worlds.

SS105 Contemporary Society (3, 3, 0)
This course will explore the volatile nature of the “now” society. It will deal with such areas as youth culture, rebellion in the home, on the street and on the campus, divergent group antagonism and the social “I” concept. The student will be given a larger decision making role concerning the context and direction of the course. However, techniques of instruction will involve social encounter and/or sensitivity methodology.

SS130 Introduction to Social Services (3, 2, 1)
A survey course designed to acquaint the student with the role and function of social services, the various agencies involved and related information. In addition, there will be some emphasis on the role of the para-professional with activities planned for self-improvement such as interviewing, role playing, listening, and other related activities.

SS140 Introduction to Corrections (3, 3, 0)
An examination of the total correctional process from law enforcement through the administration of justice, probation, prisons, and correctional institutions.

SS145 Corrections Practicum (4, 4, 0)
This course incorporates several aspects of the corrections process including the role of the practitioner, social and psychological aspects of the client, and other important information related to correctional work.

SS190 Observational Laboratory or Supervised Field Work (3, 1, 2)
The purpose of this course is to provide an opportunity for the student or para-professional to gain first hand experience in a community service agency. The student will have the opportunity for two types of experiences: (1) A study in depth of designated community service agencies, and/or (2) Participation in a community service agency with defined objectives.

SS200, Contemporary Problems (1, 1, 0)
201 This course provides for study and examination of problems and concerns, for which, hopefully, solutions can be found. Such areas of concern may include, but are not limited to, Environment, Ethics, Personal Identity, Politics, and Drugs.
SS215  Principles of Economics (3, 3, 0)
A one-semester survey course in introductory economics. Although this course provides exposure to both macroeconomics and microeconomics, greater attention is given to macroeconomics, which is related to issues of national economic policy. Units include the American Economy, The Macroeconomic System, Theory of the Firm and World Economic Problems.

SS220  General Psychology (3, 3, 0)
An introductory survey of the subject matter of psychology with emphasis on both scientific and humanistic approaches to the study of man. The course is designed to familiarize the student with what the field of psychology addresses itself to and how. Among the subjects covered are experimental methodology, human growth and development, intelligence, perception, learning, motivation and emotion, personality, disorder and therapy, and group behavior.

SS221  Child Psychology (3, 3, 0)
A study of psychological theory and experimental findings in the context of their application to understanding, predicting and modifying childhood behavior. Emphasis is on such basic concepts as heredity and environment, maturation, intelligence and achievement, learning, and childhood anxiety.

SS230  Sociology (3, 3, 0)
An introduction to the field of sociology surveying such topics as culture and society, social structure, social class, institutions, demography, deviant, and social change. Emphasis is placed upon acquainting the student with the sociological perspective of human behavior and man's modes of social organization.

SS240  National Government (3, 3, 0)
An introduction to the institutions and functions of the national government. Special emphasis will be placed upon the evolution of the present national governmental system, and also upon the need to probe and define the problems of American government and politics in terms of changing times and conditions. This course is designed to satisfy the political science requirements of all curricula.

SS251  U.S. History from 1865 to the present (3, 3, 0)
This course is a continuation of SS250. A survey of America’s political, economic, and diplomatic history from the close of the Civil War to the “Great Society” will be made. Special emphasis will be placed upon the Reconstruction of the South, the industrial transition, the Progressive movements, the world wars, the domestic wars, the emergence of the U.S. into a position of world leadership and the responsibility of this maturity.

SS280  Europe since Napoleon (3, 3, 0)
A study of the political, cultural, social, and economic developments of Europe since Napoleon.

TOOL & DIE DESIGN

TD100  Technical Drafting I (4, 2, 6) Fall Semester
This is a laboratory/lecture course and includes the development and manipulative skills needed for the use of drafting instruments, linework, lettering, geometric construction, multiview projection, sectioning and dimensioning.

TD110  Descriptive Geometry (4, 2, 6) Fall Semester
A laboratory/lecture course consisting of projection of lines, surfaces, planes, revolution of objects, intersection of planes and solids and sheet metal layouts.

TD130  Technical Drafting II (4, 2, 6) Spring Semester
A laboratory/lecture course including isometric oblique and perspective projection, welding drawings, roughness symbols and fastening devices.

TD140  Jig and Fixture Detailing (4, 2, 6) Spring Semester
A laboratory/lecture course which includes detailing of jigs, fixtures and dies from assembly layouts. The study of various fits and tolerances are covered along with the new concept of positioning tolerancing.

TD200  Die Design—Plastic Mold (4, 2, 6) Fall Semester
A laboratory/lecture course whereby the student designs transfer and injection mold dies for the production of various plastic products.

TD210  Die Design—Sheet Metal (4, 2, 6) Fall Semester
A laboratory/lecture course consisting of the layout and design of blanking, forming, piercing and progressive draw dies.

TD230  Jig and Fixture Design (4, 2, 6) Spring Semester
The following topics are covered in the laboratory/lecture course: Drill jigs with various types of locating devices, drill bushings, clamping devices, locating pins, milling and tapping fixtures.

TD240  Advanced Die Design (4, 2, 6) Spring Semester
A laboratory/lecture course which allows the advanced student to further strengthen these skills and knowledge with more complex design problems in plastic mold and sheet metal dies. The student also has an option of choosing either plastic mold or sheet metal die design as a specialty.
TRADE-TECHNICAL EDUCATION

VE100 Vocational Communication Skills (3, 0) Fall and Spring Semesters

A course to develop reading, writing, and speaking skills. Emphasis is placed on precision, clarity, and organization of written and oral communication.

VE104 Technical Math IV (3, 0) On Demand

Vocational progressions, complex numbers, solution of cubic and quartic equations, matrix algebra, linear and geometric progression equations, and law of sines and cosines with applications for industry.

VE114 Technical Math III (3, 0) Fall Semester

This course begins with a review of linear equations and proceeds with quadratic equations, trigonometric equations, logarithms and the side rule through trig functions.

VE121 Technical Math II (3, 0) Spring Semester

Algebraic and geometric concepts that have previously been introduced in previous terms.

VE113 Technical Math I (3, 0) Fall and Spring Semesters

This course is concerned with the solution of algebraic and geometric equations, and the use of algebraic and geometric methods to solve problems in a variety of fields.

VE116 Blueprint Reading (2, 0)

This course is designed to provide basic instruction in the reading and interpretation of blueprints. Students will learn the principles of blueprint reading, including symbols, dimensions, and tolerances.

VE124 Metalurgy (2, 0) Fall and Spring Semesters

This course is a study of the applications of metals and their properties. It covers the fundamentals of metals, including their structure, properties, and applications in industry.

VE127 Tool Room Operations (2, 0)

This course covers the operation of typical machine tools. Students will learn to operate a variety of tools, including lathes, milling machines, and grinders.

VE120 Materials and Strength of Machine (2, 0) Spring Semester

This course covers the properties and behavior of materials under various conditions. It includes an introduction to stress and strain, and the factors that affect the strength of materials.

VE118 Basic Electricity (2, 0) Fall and Spring Semesters

The basic principles of electricity, including Ohm's law, circuits, and power. It covers the fundamentals of electrical systems and circuits, as well as the operation of electrical equipment.

VE129 Machine Elements (2, 0) Spring Semester

This course covers the fundamentals of machine elements, including gears, belts, and pulleys. Students will learn to design and analyze mechanical systems.

VE115 Algebra and Trigonometry (3, 0) Fall and Spring Semesters

A course to develop algebraic and trigonometric skills necessary for technical courses. It covers the fundamentals of algebraic and trigonometric concepts, as well as the application of these concepts to technical problems.

VE119 Technical Drawing (2, 0) Fall and Spring Semesters

This course is designed to provide students with a working knowledge of blueprint reading and drafting. Students will learn to read and interpret blueprints, as well as to create their own drawings.

VE126 Technical Communication (3, 0) Fall and Spring Semesters

This course is designed to develop the ability to communicate effectively in technical settings. Students will learn to write technical reports, give technical presentations, and solve technical problems. The course will cover the fundamentals of technical communication, including writing, speaking, and listening.

VE117 Drafting (2, 0) Fall and Spring Semesters

This course is designed to provide students with a working knowledge of blueprint reading and drafting. Students will learn to read and interpret blueprints, as well as to create their own drawings.
WELDING

WE100 Welding Fundamentals and Practice (11, 4, 12)
This course is designed specifically to provide basic skills, fundamental knowledge, and practical capability in the welding field. A major share of the course is devoted to actual welding practice designed to master the techniques for making welds in all positions with a wide variety of manual processes. Instruction is given in oxy-acetylene welding, brazing, cast iron welding, pipe welding, silver soldering and flame cutting. Lecture, discussion, and text and study guide assignments provide the essential background material needed by the welder.

WE101 Advanced Welding (11, 4, 12)
This course incorporates theory and practice in improved mastery in welding techniques, use of processes, joint design, weld symbols, and inspection and testing of welds.

WE102 Advanced Welding Laboratory I (3, 6, 4)
Major emphasis in this advanced laboratory course is directed toward modifying manipulative techniques to produce welds in all positions which meet American Welding Society Standards for certification. The use of the largest practical diameter electrodes will be stressed and comparative analysis of electrode selection of optimum welding economy will be an expected part of student performance. Early completion of certification requirements will enable the student to develop ability to make process comparisons and economic feasibility studies.

WE103 Advanced Welding Laboratory II (3, 0, 4)
A continuation of WE102.

WE104 Advanced Welding Laboratory III (3, 0, 4)
A continuation of WE103.

WE110 Related Welding Skills (3, 1, 3)
This course covers welding theory and practice in oxy-acetylene cutting, welding, and brazing. Electric arc welding theory and practice with mild steel electrodes in flat and vertical position to meet visual inspection requirements as they would apply in automotive areas.
LeGree, Lawrence, M.S.
Minnick, Robert, M.A.
Morford, Lester, M.A.
